

Where do I find my DLP Policies?

Policy Catalog > Data Loss Prevention 11.x

The screenshot shows the McAfee Policy Catalog interface. The left sidebar lists various products, including Active Directory Connector 1.5.0, Data Loss Prevention 11.6, Endpoint Security Adaptive Threat Protection, Endpoint Security Common, Endpoint Security Firewall, Endpoint Security Threat Prevention, Endpoint Security Web Control, Management of Native Encryption, McAfee Agent, McAfee Client Proxy, McAfee DXL Client 6.0.3, MVISION Endpoint 2011, and VirusScan Enterprise 8.8.0. The main area displays the 'Policy Catalog' for 'DLP Policy'. It contains a table with columns: Name, Rule Assignments, Assigned To, and Actions. The table lists several policies, including 'McAfee Default', 'My Default DLP Policy', 'Default Windows Client Configuration', 'McAfee Default', 'Default Mac OS X Client Configuration', and 'McAfee Default'. The 'Default Windows Client Configuration' policy is highlighted in blue. The 'Actions' column for this policy shows 'Edit' and 'View' links.

How Do I Duplicate a Policy? Example WCC

The screenshot shows the McAfee Policy Catalog interface with the 'Default Windows Client Configuration' policy selected. The 'Policy Details' panel is open on the right, showing the policy name, notes, owner, and assignments. The 'Edit' button in the 'Policy Details' panel is highlighted with a red box. The 'Default Windows Client Configuration' policy is also highlighted in blue in the main table.

Select a Name for the duplicated policy

The screenshot shows a 'Duplicate Policy' dialog box. It has a title bar that says 'Duplicate Policy'. The dialog contains a text input field for 'Name' with the value 'Windows Client Configuration Test'. Below it is a text area for 'Notes' with the value 'Duplicated Windows Client Configuration Test'. At the bottom, there are 'OK' and 'Cancel' buttons. The background shows a blurred view of the Policy Catalog interface.

Now you have your New Policy Duplicated
