How to create a Query / Report for CSR Hits by Rulename
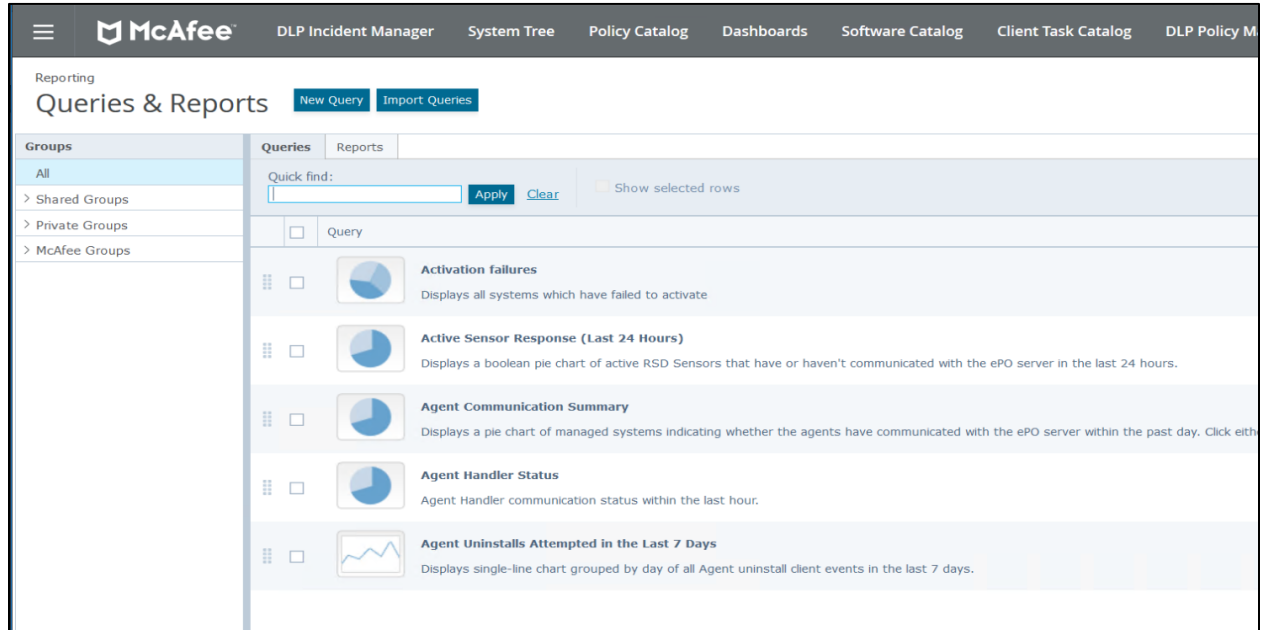

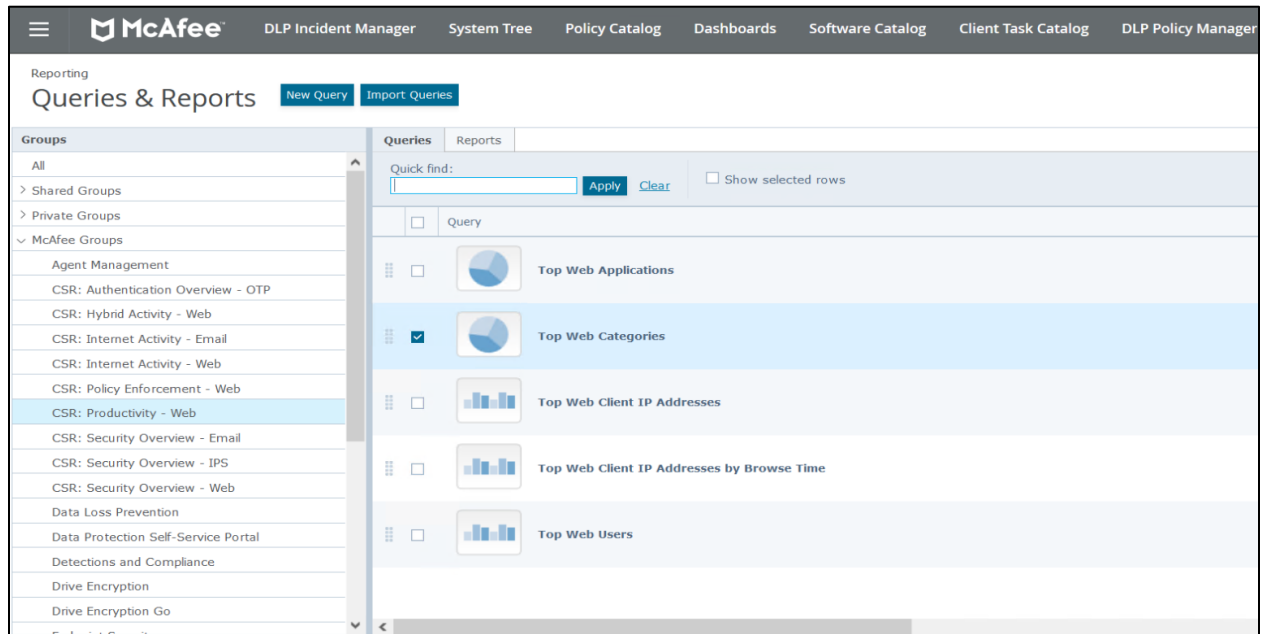

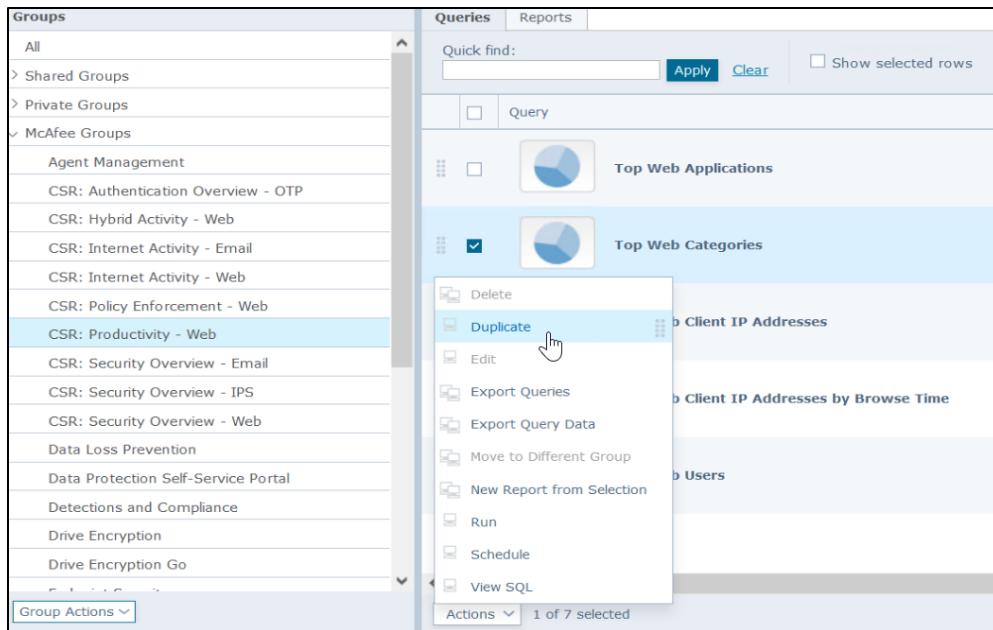

1. ePO Menu > Queries & Reports

2. Go to McAfee Groups > CSR: Productivity – WEB
3. Select "Top Web Categories" (as an example) > Actions Duplicate and save
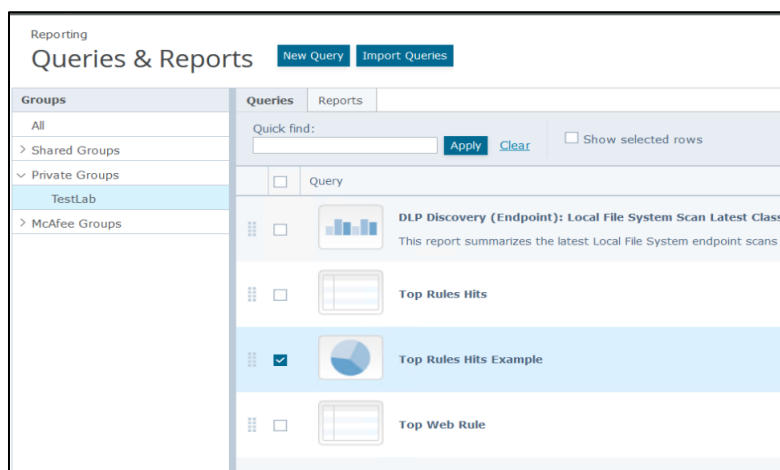

Select a Name a group and Click OK

4. Go to the Group and select the recent created Query

Click Actions > Edit

5. Select the type of Chart to Show (Bars, Pie Chart or Table), the "Sum of hits"

6. In this example you can use "Pie Chart" for "Rule Names" and Summary of "Hits"
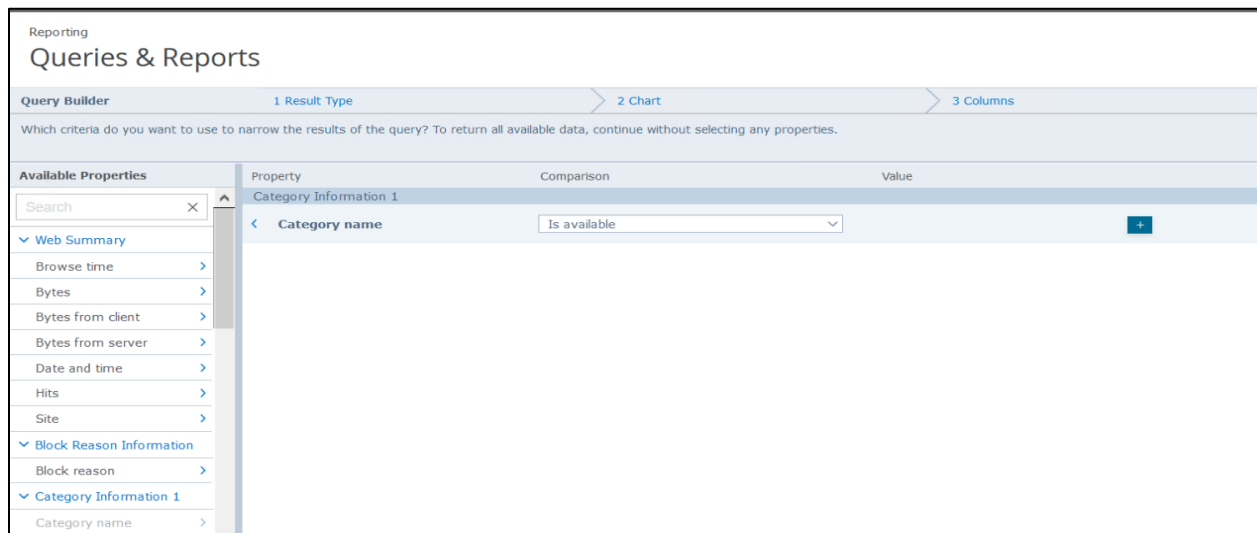

7. In the next Step you can select what information you need to show as this example:
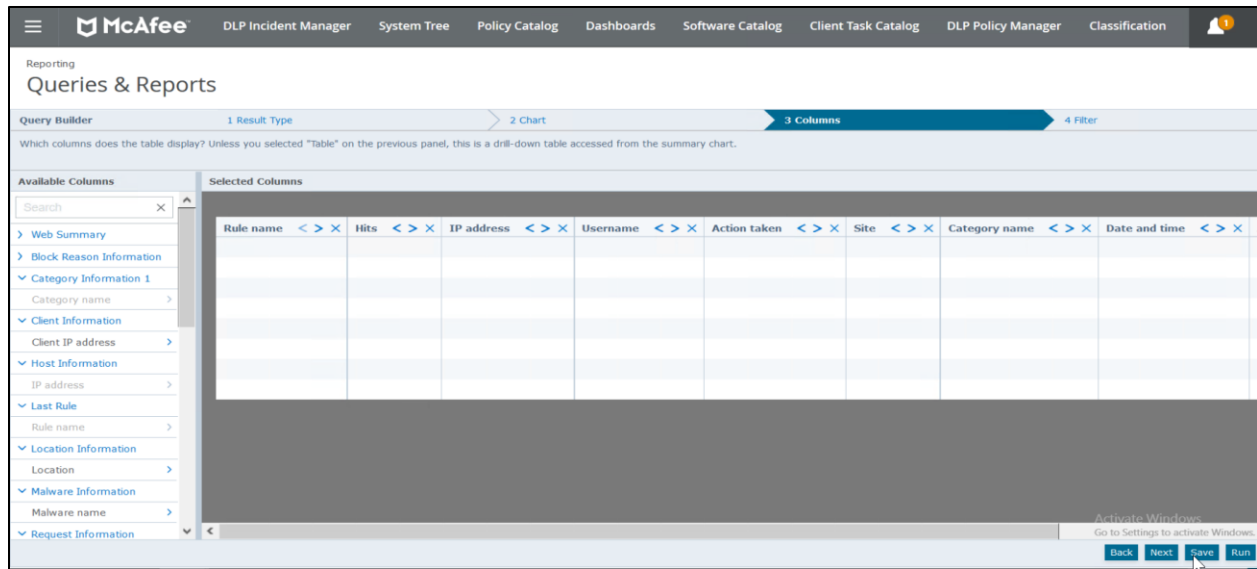

8. At the end of the settings you can filter for any setting you need or you can leave it blank to get all the information.

9. Finally, you can save the Query, and
10. Run the Report.
